

Participant Information Sheet for Survey of Improving Coderunner

Name of department: Computer and Information Sciences

Title of the study: Improving Coderunner

Introduction

My name is Michal Skraburski, I am 4th Year Computer Science undergraduate student at Strathclyde. You can contact me at my personal university michael.skraburski.2022@uni.strath.ac.uk email. Alternatively, my discord is @maikerudev.

What is the purpose of this research?

The purpose of this study is to identify issues within Coderunner, evaluate solved solutions for further improvement and solve currently existing problems within the Moodle plugin.

Do you have to take part?

Your decision to participate in this study is entirely voluntary, you have the right to refuse and the right to withdraw from the survey at any moment, without detriment in any way, shape or form.

What will you do in the project?

You will be asked a series of questions which will ask you to name (if any) issues that are of detriment to your usage within Coderunner. It may be a User Experience Design problem; it may also be a functional one. You will also be asked to view currently existing solutions and describe alternatives, evaluate alternatives presented to you, and judge which you prefer.

Why have you been invited to take part?

You have been asked to take this survey because you are either; a student, an alumnus or a teacher of Computer and Information Sciences at Strathclyde. The sub criteria is that the survey prefers you have used Coderunner, by either authoring or taking an online quiz/test on the `myplace.strath` platform.

What information is being collected in the project?

All data collected is anonymous, and any personally identifiable data will be discarded. The only data collected will specifically be your opinion, thoughts and ideas, which may be used to improve Coderunner, or evaluate the accessibility and design of Coderunner.

Who will have access to the information?

Any non-personally identifiable information will be kept (such as your opinion) and will not be published. All personally identifiable information will be discarded, therefore remain confidential and anonymous.

Where will the information be stored and how long will it be kept for?

Your data will be stored using Qualtrics. Anonymous research data will be stored indefinitely within an unpublished paper in the form of graphs, quotes or analytical reviews. Any personal data is filtered and immediately discarded.

Thank you for reading this information – please ask any questions if you are unsure about what is written here.

What happens next?

If you wish to find out more about the project and/or participate in the survey, please contact the researcher (contact details below). You'll receive a response with a consent form and a link to the survey upon completion.
